# The ATLAS Experiment

CERN - Geneva, Switzerland

ATLAS explores...where quarks and gluons collide...

where forces unify...where extra dimensions may lurk...

where dark matter reigns...to find the truly fundamental.

ATLAS is a particle physics experiment conducted by scientists from 35 nations at the CERN Laboratory in Geneva, Switzerland. It will explore the fundamental nature of matter and the basic forces that shape our universe. This poster is available from CERN. The ATLAS statue image is courtesy of NYCTourist.com
